

# CONTRAIL

Internationale Spedition GmbH

## COMPANY PROFILE

Founded in 1996 **ConTTrail** is active in the European container and trailer transport market.

Our aim is to achieve a high standard of service for our customers. Long time cooperation with our partners and principals leads to efficient operating methods. A good network builds the base for our solid transport solutions and services.

We closely work together with our customers to create tailor-made solutions and monitor each step of the process to ensure that our

customer's individual requirements are fulfilled according to our agreement. Our own ConTTrail Quality System (CQS) is the basis for optimized working processes and service supervision.

**Consulting** – We can offer advice to companies on a consultancy basis regarding transport and logistic solutions. The range of our activities covers project consulting, costs analysis and process optimization. We can assist in finding tailor-made solutions for your aims.

Yours Margit Knapp

## PRODUCTS AND SERVICES

We arrange transports for the following product lines: Automotive, electric products, sports equipment, garden furniture, groceries, paper, steel and building elements.

**Trailer** – We recommend trailers as the most flexible equipment for door to door traffics within Europe. Because of the remarkable technical variety of this equipment we are in the position to match the correct type of equipment to our customer's requirement. Depending on the service requested we can also organize driver accompanied or unaccompanied transports.

**Intermodal** – Cost saving and a reduction of environmental impact are the main reason for using intermodal transport solutions by using private operators. We are covering intermodal transports with containers, swap bodies and trailers. We are also using barge transports from Rhine, Main, Neckar and Danube ports.

**Container** – Containers are used for direct door to door traffics by road as well as overseas. They are well suited for intermodal transport methods. Swap bodies are preferred in combined transports to Switzerland, southern Europe and Scandinavia.

## OUR TRANSPORT REGIONS

European continent, Great Britain and Ireland, Russia, Turkey and other border countries.

## OUR NETWORK

**References** – We would like to mention some of our customers with whom we have a long term relationship as for example:

- » ArcelorMittal
- » Brata
- » Brother
- » Kettler
- » Klasmann-Deilmann
- » Vorwerk

We are at all times a qualified and reliable partner for our customers.
